

# COMPARE EARGO TO THE COMPETITION

## EARGO HEARING AID

Eargos are virtually invisible hearing aids that sit inside the ear canal and are comfortably suspended by Flexis (soft pieces of medical-grade silicone). They're great for active, on-the-go adults who don't want to be slowed down by traditional hearing aids.

## BEHIND THE EAR HEARING AID

Cleverly named behind-the-ear (BTE) hearing aids sit—you guessed it—behind the ear. The housing holds the battery microphone, and controls, with an earpiece that wraps around and into your ear. These are typically better for those with severe or profound hearing loss.

## PERSONAL AMPLIFIER

Personal amplifiers are meant to amplify environmental sounds for "non-hearing-impaired" consumers. In other words, they make everything louder—and louder isn't necessarily better. Personal amplifiers are not intended to help with any level of hearing loss.

## HOW DO THEY STACK UP?

	EARGO	BEHIND THE EAR	PERSONAL AMPLIFIER
HEARING LOSS TREATED	Mild to moderate high-frequency hearing loss	Moderate to profound	None

	nearing loss		
<b>ARE THEY NOTICEABLE</b>	<b>Most discreet</b>	<b>Quite noticeable</b>	<b>Most noticeable</b>
<b>COMFORT</b>	<b>Very comfortable and breathable</b>	<b>Depends on the model. Can be uncomfortable with glasses</b>	<b>Depends on form factor</b>
<b>BATTERY LIFE</b>	<b>16 hours (rechargeable) Up to 5 days (charging case)</b>	<b>Around 1 day (rechargeable) 3-10 days (single-use)</b>	<b>5 - 7 days (single-use)</b>
<b>PROFESSIONAL SUPPORT</b>	<b>Unlimited hearing professional support via phone</b>	<b>In-clinic initial fitting and follows-ups</b>	<b>No licensed support</b>
<b>HEARING TEST REQUIRED</b>	<b>No</b>	<b>Yes</b>	<b>No</b>
<b>PRICE (PAIR)</b>	<b>\$1,450 - \$2,950</b>	<b>Average price \$4,600</b>	<b>Average price \$300</b>
